CORE COURSES

Artificial Intelligence in Business (IS)

Time volume (in hour): 12

ECTS: 2

Module's Manager: PETANI Fabio James

Pre-requisites: None

Description: This is an introductory course to the field of Artificial Intelligence (AI) and its application in business. It adopts both a technological and managerial perspective to unravel the concept of AI and explain how contemporary organizations adopt AI-based systems and technologies to transform the way they do business. While the technological perspective explores the technical foundations and the basics for developing AI-driven systems and technologies, the managerial perspective looks at how the adoption and implementation of AI and its associated cutting edge technologies impacts the management operations of various types of firms and organizations. This course aims at equipping students with the necessary skills for assessing the strategic value for AI adoption and implementation to solve prevailing business problems and improve the functioning of firms. The overall goal of this course is to conceptualize an AI-driven business strategy for a firm that aims at investing in AI-associated structures and yield the benefits of this powerful technology.

Learning objectives: Combining both the technological and managerial perspectives, at the end of the course, students will be able to: - Understand the fundamental notions of AI and its associated technologies. - Assess the different ways AI-driven systems and technologies impact and transform firms and organizations and the way they do business. - Understand the implementation process of various types of AI systems and technologies within firms and organizations. - Identify the strategic value behind AI adoption and implementation within an organization. - Conceptualize a business strategy for AI adoption and implementation within a public or private organization.

Methodology: This module relies on a variety of pedagogical tools and methods. The teaching is interactive and is based on active learning methods. Students are encouraged to take an active participation in class through taking the initiative and look forward for the acquired knowledge. Various active tools including case studies and active assignments are employed to help students in the active learning process. The lecturer uses presentations, illustrations, and complementary tools in delivering the lectures to facilitate the acquisition of knowledge by students.

Assessments:

Individual continuous assessment - Written exam 50%

Group final exam - Collective oral presentation 50%

Skills:

BACH GK 05 - To know the main digital and decision making tools

BACH GK 05.05 - Anticipate the impact of Artificial Intelligence on business activities

Ecological transition

Time volume (in hour): 27

ECTS: 4

Module's Manager: NOISETTE Bruno

Pre-requisites: None

Description: The Ecological Transition module aims to provide students with a solid theoretical knowledge in the main disciplines involved in the management of ecological transition, in order to build the skills expected in the exercise of their future profession (collective intelligence, autonomy, responsibility, teamwork, interpersonal skills, management of uncertainty, etc.). The content of this module encompasses both theoretical knowledge in the challenges of ecological transition (physical science, humanities, economics, ecology) and practical know-how (developing one's personal project, development of support tools for analysis of opportunities...). This learning should make it possible to intervene in the most relevant way in the action, on the basis of this understanding of the context and of all the issues (technical and socio-ecological).

S1 - Dive into the Anthropocene and glimpse into the future - serious game: the future is already here: The student is able to identify the issues of behavior change following awareness of the concept of the Anthropocene
S2 - History of energies and the thermo-industrial world: beginning, peak and decline announced: The student is able to identify key concepts in the history of energy
S3 - The Great Acceleration, or when Homo Sapiens became responsible for environmental crises. Welcome to the Anthropocene. : The student is able to analyze and estimate the impact of the human factor within the Anthropocene
S4 - Global warming : The student is able to represent the concept of global warming
S5 - Solving Kaya's equation : The student is able to discriminate between the different possible solutions of Kaya's equation
S6 - Technologies... They solve Kaya's equation : The student is able to recognize the technological and ecological actors who propose solutions to the Kaya's equation
S7 - Stories, Myths and Eco-Psychologies : The student is able to rewrite a story of behavior change
S8 - Intelligences : The student is able to recognize and choose his own intelligences in the service of change
S9 - Starting the transition : The student is able to synthesize the knowledge acquired and produce hypotheses in an individual narrative

Learning objectives: - Eco-design your daily life and your future - personal project - Being able to interpret environmental crises - Be able to develop your personal story of resilience in the face of the transition - To be able to recognize the relevance of collective and emotional intelligences and to apply them

Methodology: transformative learning & experiential learning (group work, presentations, reflective writing projects, simulations, case study discussions)

Teaching tools: Cases. Course support

Pedagogical methods: Workshops for identifying problems and opportunities. Discussion groups. Simulations. Internet. Games. Methods & tools for self-analysis. Free discussion around a theme

Assessments:

Individual continuous assessment - Individual executive summary 50%

Individual continuous assessment - Quiz 50%

Skills:

BACH GK 02 - To know the main concepts of entrepreneurship and strategic analysis

BACH GK 02.04 - Anticipate the impact of ecological transformation on business activities

BACH GK 06 - To know the ethical stakes and social responsibilities of a company

French culture and society S1

Time volume (in hour): 21

ECTS: 4

Module's Manager: TALPAIN Iryna

Pre-requisites: None

Description: A panorama of today's French culture and society: The family, work and employment, entertainment, religion, education, the institutions... A guided tour (Dijon or Lyon)

Each class: - a mix of lectures, discussions, role plays A 3-hour guided tour (Dijon or Lyon)

Learning objectives: At the end of this module, students will be able to understand the way the French society works, the values and beliefs held by the French, some of the people's idiosyncrasies and cultural differences between their native country and France.

Methodology: An interactive class: - lectures and discussions - guided tours - reflective writing (a diary) - role plays As interactive as possible

Teaching tools: CD - Support Audio. DVD - Video support. Course support. Others

Pedagogical methods: Critical analysis. Discussion groups. Oral presentations. Debates. Free discussion around a theme. Internet. Games

Assessments:

Individual continuous assessment 50%

Individual continuous assessment 50%

Intercultural Management and Communication S1

Time volume (in hour): 21

ECTS: 4

Module's Manager: TALPAIN Iryna

Pre-requisites: None

Description: Foreign culture and communication: foreign students will be mixed in the class to share their experiences and are asked to understand other cultures. They can therefore approach intercultural management during the sessions through exercises and situations from other cultures. Main topics: Intercultural management, communication in a foreign culture and team building. Inclusive language. Cultural differences.

Each class: lectures, discussions, critical incidents, role plays, case studies, group communication via Teams, mini-tests & assignments via Forms A group project followed by a group presentation (e.g. a FlipGrid video) Topics: Culture shock, values and heroes, discrimination, cultural differences and communication in Management, Inclusive language, critical incidents in management, Diversity and how to manage it, etc

Learning objectives: To facilitate social integration of foreign students at BSB through a better understanding of the cultural differences between France and their home countries To increase awareness of differences among business people (values, customs, traditions, etc.) from other cultures to pave the way for successful intercultural management and communication To respect other cultures within an international context To make students more communicative in a foreign culture and team building To learn how to lead global organizations with a diversity of profiles To show the importance of inclusive language

Methodology: Blended learning: a mix of traditional face-to-face classes (lectures, discussions, critical incidents, role plays, case studies) with online activities (all class materials, assignments and group communication are via Microsoft Teams + FlipGrid videos).

Teaching tools: DVD - Video support. Cases. Course support. Others

Pedagogical methods: Researches. Critical incidents. Discussion groups. Oral presentations. Theater activities. Case studies. Projects. Internet. Games. Free discussion around a theme

Assessments:

Individual continuous assessment 30%

Group continuous assessment 30%

Individual continuous assessment 40%

International financial and economic news

Time volume (in hour): 27

ECTS: 4

Module's Manager: ASHTA Arvind

Pre-requisites: None

Description: The aim of this course is to foster critical thinking of future managers and business actors, to decipher important international and global issues, a necessary skill in today's firms' strategies (decision to relocate or settle in a country or region, knowledge of the economic, political and social environment of MNF and subsidiaries). The special focus on data research and analysis as well as the development of oral and written presentation skills also aims at preparing students to activities of country risk management and business intelligence, more and more crucial specializations in an increasingly interdependent environment.

Based on the news, the following subjects can be treated: 1. Monetary and financial economics 2. Financial system architecture, especially in the wake of new technologies. 3. Principal Financial markets and principal Financial products 4. Banking system (role of banks, money creation, central bank, lender of last resort) 5. International Monetary problems: exchange rate, Balance of Payments) 6. International Financial problems (crisis, bank regulation and international finance)

Learning objectives: BACH GK 01.03 - Analyser l'actualité économique et sociétale au niveau mondial de manière approfondie

Methodology:

Teaching tools: Periodical. Course support. Cases

Pedagogical methods: Critical analysis. Researches. Debates

Assessments:

Individual continuous assessment - Individual dossier 60%

Group continuous assessment - Collective dossier 40%

Skills:

BACH GK 01 - To know the main concepts of socio-economic and legal aspects of the organizational environment

BACH GK 01.01 - Analyse economical and societal news

BACH GS 01 - To be able to analyse information and communicate

International issues (ECH)

Time volume (in hour): 18

ECTS: 3

Module's Manager: DITTER Jean-Guillaume

Pre-requisites: NA

Description: This course provides an overview of the major themes and issues within the field of geopolitics, allowing students to develop a broad understanding of the subject matter and its practical implications in the contemporary business world. Course objectives Develop an understanding of the concept of geopolitics, including its historical context, theoretical frameworks, and practical applications. Analyze and evaluate the complex interactions between geography, politics, and international relations in shaping geopolitical dynamics at the global, regional, and national levels.

Session 1 – Introduction: Definition of geopolitics, historical context, and theoretical frameworks
Session 2 – Post-Brexit EU: Consequences of the United Kingdom's decision to leave the EU, including its impact on European integration and global alliances. Session 3 – The Ukraine crisis: Factors contributing to the conflict between Ukraine and Russia, including territorial disputes, energy interests, and geopolitical rivalries
Session 4 – Global China: China's political and economic presence worldwide, current implications
Session 5 – The USA: Domestic evolution and global presence, relationships with China
Session 6 – The Indo-Pacific region: Strategic importance, power rivalries, and emerging alliances in the Indo-Pacific region

Learning objectives: Course learning goals Explain the key concepts of geopolitics, including its theoretical foundations and the contributions of major geopolitical thinkers. Critically examine various contemporary geopolitical challenges Develop research skills to gather and analyze relevant data, employ appropriate methodologies, and critically evaluate various sources in the field of geopolitics. Communicate effectively through written assignments, oral presentations, and class discussions.

Methodology:

Teaching tools: E-learning. Cases. Course support

Pedagogical methods: Case studies. Researches. Oral presentations. Debates. Internet

Assessments:

Group continuous assessment - Collective case study 40%

Individual final exam - Written exam 60%

International Marketing Case Studies

Time volume (in hour): 27

ECTS: 4

Module's Manager: DUNCAN Allen Scott

Pré-requis: Aucun

Description: The course takes a deeper look at the role of marketing in organization problem solving practices. Through the analysis of real-life cases one will study how the functions of marketing impact the challenges that arise between an organization and its various stakeholders. The course will deal with different cases that study one or more marketing concepts like a situational analysis; targeting, segmenting, & positioning; and the marketing mix.

Objectifs d'apprentissage : Examine the role of marketing in organization problem solving practices. Analyze real-life case studies. Compare and contrast different organizational marketing situations.

Démarche pédagogique :

Outils pédagogiques : E-learning. Cas. Support de cours

Méthodes pédagogiques : Études de cas. Groupes de discussion. Présentations orales

Evaluations pédagogiques :

Contrôle collectif continu - Dossier collectif 50%

Contrôle individuel final - Examen sur table 40%

Contrôle individuel continu - Quiz 10%

Compétences :

BACH GK 04 - Connaître les principaux outils commerciaux et marketing

BACH GK 04 04 - Recueillir et exploiter des données pour réaliser une étude de marché

BACH GK 04.02 - Mettre en place des tableaux de bord commerciaux

BACH GK 04.03 - Connaître les principaux concepts et outils pour construire une stratégie marketing

Leadership and project management

Time volume (in hour): 27

ECTS: 4

Module's Manager: BALLEREAU Valerie

Pre-requisites: None

Description: This module will be based on experiential learning.

Learning objectives: Define the concept of project and project management & Explain the purpose of a project management methodology Describe the 5 phases of project management Describe the types of leadership Apply verbal and non-verbal communication Implement collective intelligence Arguing one's leadership style

Methodology: Experiential learning

Teaching tools: E-learning. Manual. Course support. Work

Pedagogical methods: Projects. Oral presentations

Assessments:

Group continuous assessment - Collective oral presentation 50%

Individual final exam - Quiz 25%

Individual midterm assessment 25%

Skills:

BACH GS 02 - To have a professional behaviour

BACH GS 02.01 - Be able to manage a project independently and assume responsibility

Management challenge (IS)

Time volume (in hour): 12

ECTS: 2

Module's Manager: AJDUKOVIC Ivan

Pre-requisites: Notions in finance, marketing, tax system et strategy.

Description: Online business simulation

In a team, define and adapt a firm's strategy in order to improve sells and profitability in a competitive environment

Learning objectives: Understand how a company works Understand relations between different dimensions of the same company Identify how competitors can affect your firm's performances Improve ability to take decisions Enhance teamwork and leadership Improve general skills 2, 3 and 4

Methodology: 4 sessions of 3h

Teaching tools: Manual

Pedagogical methods: Simulations. Internet. Competition

Assessments:

Group continuous assessment - Simulation game 35%

Group final exam - Collective dossier 15%

Individual final exam - Individual executive summary 50%

Skills:

BACH GK 05 - To know the main digital and decision making tools

BACH GK 05.03 - Use decision-making tools

BACH GS 02 - To have a professional behaviour

Organisational Behaviour

Time volume (in hour): 15

ECTS: 3

Module's Manager: HERNAN GONZALEZ Roberto

Pre-requisites: Basic skills in microeconomics and mathematics

Description: The experimental method has recently become an indispensable, but still controversial tool in the manager's toolbox. This course offers a view in the promises and pitfalls of the experimental approach in management and business, with a focus on 10 items related to decision making. The course tries to make a strong case of the need for experimentation based on game theory in management and business. The following table reports the 10 items, together with a brief description. On each item the relevant experimental literature is discussed, together with other (biased) observation techniques. Course based on experimental methods in economics and psychology : hot (laboratory) experiments, cold (strategy method) experiments, field experiments (as part of a team project). At the end of this course, students will know : That « common sense » is not a research method What are the research methods to study behavior That you have to try to walk in your neighbor's shoes That you should always evaluate the consequences of all interaction between people That we can have an influence on the others What is trust, envy, manipulation, motivation...

The teaching hours will consist in a mixture of lectures, experiments, films and case study discussions, project work and field experimental work, on each item (each listed item is overviewed through all these methods). The lectures will give students the opportunity to learn about new experimental tools to study fundamentals of decision making and to understand how and when they should be used by a manager. They will familiarize students with dealing with uncertainty about human reactions in several decision problems and show them general facts about behaviour. The lab experiments will show students how proper data about people can be collected, how to avoid declarative problems, how to be surprised about own reactions and to take them into account. The film and case study discussions will help students to deeply understand the day-to-day behavioural issues in managing people. The project work will give students the opportunity to put into practice all terms and tools they are learning in a decision problem, will give them the opportunity to exchange within a group and to peer evaluate their knowledge and skills and will allow them to construct a lab experiment with people. The field experiments are closely related to the project work and will familiarize students with collecting data without biases, choosing the right method, interpreting data and formulate recommendations. 10 items Focal point : motivation Between two classes: think about strategy into a game Each class : theory plus laboratory experiment From October until December: teamwork on a project

Learning objectives: Take into account perceptions about others and about others' perceptions... This module will give students the opportunity to explore the experimental method in management decision making, in order to state unbiased conclusions, to analyse interactions, to understand behaviour. Each topic will allow students to understand a new issue related to behaviour and decision making in business (as indicated in the course content). In addition to these and generally speaking, at the end of the module, they should be able to: • Understand the principles of the experimental method and the need to use it in management. • Develop a lab or a field experiment to study a behavioural issue • Understand and analyse behaviour and relation to contexts • Reason logically and work analytically on human interactions in business • Justify conclusions using economic and psychological arguments with appropriate rigour.

Methodology: Experimental lab, field experiments, films

Teaching tools: CD - Support Audio. E-learning. DVD - Video support. Cases. Periodical. Data base. Course support. CD - Support Audio. E-learning. DVD - Video support. Cases. Periodical. Data base. Course support.

Pedagogical methods: Seminars. Workshops for identifying problems and opportunities. Critical analysis. Case studies. Researches. Critical incidents. Discussion groups. Projects. Oral presentations. Debates. Aquarium. Simulations. Diagnostics. Internet. Games. Events organization. Methods & tools for self-analysis. Inquiries. Analysis of similar behaviours. Panel analysis. Free discussion around a theme

Assessments:

Group final exam 50%

Individual continuous assessment - Simulation game 50%

Skills:

BACH GK 01 - To know the main concepts of socio-economic and legal aspects of the organizational environment

BACH GK 01.04 - Understand how behaviour influences the decision-making process of a person

BACH GS 01 - To be able to analyse information and communicate

Pathfinder Days

Time volume (in hour): 14

ECTS: 3

Module's Manager: BALLEREAU Valerie

Pre-requisites: None

Description: The aim of this Pathfinder workshop is to enable students to work on their self-knowledge and professional integration in order to reflect on their alignment: i.e. to ensure that they make career choices in line with their profile, and to identify the soft skills they need to develop to boost their employability.

Learning objectives: - approfondir sa connaissance de soi pour être capable de pitcher son profil devant des futurs employeurs.

Methodology: Experiential Learning

Assessments:

Individual continuous assessment - Individual oral presentation 100%

Skills:

BACH GS 02 - To have a professional behaviour

BACH GS 02.11 - Identify pathways to a specific professional field at the end of the training

Strategy, SME and entrepreneurship

Time volume (in hour): 27

ECTS: 4

Module's Manager: REBOUD Sophie

Pre-requisites: None

Description: Introductory course on SME Strategy and entrepreneurship: SMEs and their diversity, proximity Strategic analysis: BM and its contextualisation, internationalisation of SMEs Fundamentals of entrepreneurship

Session 1 Introduction Work on the concept of SME Session 2 Asynchronous Video case in 5 parts Sessions 3 à 8 Work on the 6 themes of the video Session 9 Presentations Wrap up and debriefing

Learning objectives: Understand and analyse SMEs and their strategies Understand and analyse the fundamentals of the entrepreneurial approach Apply a simple method of strategic analysis

Methodology: Active learning Problem based learning

Teaching tools: E-learning. Cases

Pedagogical methods: Workshops for identifying problems and opportunities. Case studies. Researches

Assessments:

Group continuous assessment - Collective dossier 30%

BACH 3 Italiano S5

Time volume (in hour): 13.5 **Total student workload:** 60 **ECTS:** 2 **Semester:** Autumn

Module's Manager: POUX-MOINE Sandra

Pre-requisites: Buona conoscenza della lingua italiana; la grammatica italiana e il vocabolario acquisito del secondo anno accademico

Description: Corso indirizzato agli studenti iscritti al terzo anno Bachelor. Il corso, che si sviluppa intorno al tema degli affari internazionali, prevede sia una parte teorica che delle attività pratiche.

Il corso offre una preparazione avanzata nel campo dei rapporti internazionali che coinvolgono l'Italia e le imprese italiane. Le competenze acquisite consentiranno allo studente di analizzare, interpretare, valutare e gestire i vari aspetti (ad esempio i processi di globalizzazione) nei quali si focalizza la dimensione internazionale dei fenomeni politici, giuridici, economici e sociali.

Learning objectives: LG3 GK/GS-07.1 Understand and communicate in foreign languages Fornire gli strumenti fondamentali della lingua e del vocabolario che permettono una buona comunicazione. Alla fine del corso gli studenti dovranno aver consolidato la conoscenza della lingua ed essere in grado di utilizzare il lessico specifico riferito al mondo del lavoro e dell'impresa. Gli studenti quindi avranno la possibilità di perfezionare le loro conoscenze linguistiche che permetteranno loro di comunicare con clienti e colleghi ma anche di apprendere il funzionamento del sistema economico e commerciale italiano.

Methodology: Spiegazione delle basi della grammatica da parte dell'insegnante, esercizi sul vocabolario, utilizzo supporti audio e video per la comprensione orale, per l'espressione orale e scritta e di testi di carattere commerciale, economico riferiti al mondo dell'impresa.
